Introduction

This document is the Configuration Status Accounting Report for Change Request (RFC) ID: 001, associated with Configuration Item (CI) ID 01, under the responsibility of the Program Office/Region designated as a Private Company.

This report aims to record and communicate the current status and attributes of the CI after the implementation of enhancements requested by the government to strengthen the system's audit capabilities. The document details the evolution from the previous version hosted in the project repository to the current state, documenting the addition of critical sections such as requirements specifications, general design, and SWOT analysis. It also establishes the implementation schedule stipulated for July 5, 2025, and identifies the affected areas, specifically Module 1 (Data Listener) and the API management interfaces (RF-007 and RF-010), ensuring that all changes are controlled and traceable in the official repository.

Objectives

The primary objective of this report is to provide an accurate and up-to-date record of the configuration status of CI 01, ensuring the traceability of the requested modification and its compliance with the established baseline (ACBI-PROJECT).

Documenting Configuration Attributes: Accurately record the current version (Version 01), the reference baseline (ACBI-PROJECT), and the associated documentation repository, maintaining the integrity of the information in the configuration management database (CMDB).

Status Accounting Report

General Identification Information

- Unique Change ID (RFC ID): 001
- Configuration Item ID (CI ID): 01
- Responsible Program Office / Region: Private Company
- Project Phase: [Initial, In Progress, Final]

Attributes and Status of the Configuration Item (CI)

Attribute	Registration Detail
Current Version	01

Attribute	Registration Detail
Baseline	ACBI-PROYECT
Relationships	N/A
Associated Documentation	https://github.com/EimySenrioth/software_administration

Change Registration and Control

Reason for Change
Improve auditing capabilities requested by the government.

Change Status
[Pending / Under Review / Approved / Rejected / Incorporated]

Implementation Schedule

- Estimated Implementation Date: July 5, 2025
- Areas Affected by the Implementation:
    - Module 1: Data Listener
    - RF-007: API EDITING
    - RF-010: API MANAGER

Version History

1. Previous Version:
   https://github.com/EimySenrioth/software_administration/tree/main/Data-proyect
2. Changes Made Since the Last Version:
   Added the following sections: Analyze Requirements, Software Requirements Specification, Product Perspective, User Classes and Characteristics, Specific Requirements, Functional Requirements, Non-Functional Requirements, Design Overview, Resource Planning, Material Resources, Item Configuration, Change Request, and SWOT Analysis.

Approval and Release Control

- Approval History: March 8, 2026
- Release Certification: Has it been formally reviewed and approved? [Yes / No]

- Officialization Date: March 8, 2026
- Conformity Signature / Seal: Person
